

## Brass catcher for Walther GSP 500 cal .32

For optimum results  
adjust the rotating head.

You also have a removable  
anti-return flexible «jaw teeth».

**Optimal results are done with  
reloaded cartridges (0,09 to 0,08  
grams charge).**

Do not use excessive force  
when tightening  
and manoeuvring.

This product is made  
in 3D printing.

**Do not expose too long  
in the sun by strong heat.**

- # 1: Insert the bracket into the base of the charger.
- # 2: Insert the magazine into the gun.
- # 3: Insert the net into the holder.

For disassembly, repeat these operations in  
reverse order (except # 1).

Note: The ejection of the casings is not regular, it is possible  
that the behavior of some is not optimal.
